

Lead Free and LEED Rated Synthetic Grass Innovations

Whether you're interested in well manicured lawns or playing sports, PolyTurf products can be designed and professionally installed to suit your needs with ease and innovation.

PolyTurf offers an innovative approach to landscaping with an environmentally friendly, aesthetically pleasing, soft-to-touch and long lasting synthetic grass.

PolyTurf products look and feel like natural ground cover, but have been proven to be a cost effective, water efficient and virtually maintenance free alternative.

Whether you install PolyTurf yourself or have a certified installer do it for you, the process is easy and guaranteed to offer many years of trouble-free, useful and attractive service. Life Cycle Management Programs are available.

Street Beautification in the City of Newport Beach

The optimal choice for green building in an urban development is a synthetic streetscape to assist in the management of storm water run off and water conservation.
